Tip 4: Pay attention during class and get involved

Tip 5: Organize and pack the schoolbag every day

Tip 6: Eat and drink enough healthy food and beverages at school

Tip 7: Take advantage of the full-time programme at your school

Tip 8: Practice for school at home in peace

Tip 9: Eat dinner together and talk about the day

Tip 10: Read to your child before she/he falls asleep

We make sure Tim takes his sports gear with him when he has PE class: sport clothing, sport shoes. Every day we help him organize and pack his bag for school.

We are happy about Tim’s progress in reading and writing. He likes practicing at home. That is why he has his own desk. We ask about his homework every day and let him explain to us what he did.

We signed Tim up for lunch at school and pay for it. Also we pack him a healthy snack and a drink for the big break.

We read to Tim every evening. He enjoys it – and so do we.

We are happy that the family eats dinner together. That way, everyone can talk about their day – and we can ask Tim about his day at school.

We may want Tim to read and write mail for that. I need to concentrate so I can do everything right.

We drew pictures in class. Now our teacher is looking at them and giving us advice on how we can improve them further.

I helped each in the school cafeteria. It was often tarty and my friend, eat them too.

I’m learning to read and write mail. For that I need to concentrate so I can do everything right.

Tim shows us the things he did in school. We show interest in them.

Tim is enjoying what the full-time programme has to offer – and we know that he is taken good care of.

It’s important to us that the family eats dinner together. That way, everyone can talk about their day – and we can ask Tim about his day at school.

A guide for school enrollment addressing parents and children

My school day
Dear parents,

Your child is starting school. You may ask yourself: What is going to change for us? We aim to answer this question with comprehensive information material. The brochure at hand deals especially with daily school routines. A day at school is more than a couple of classes. Pupils need a strong support structure which parents need to provide. That begins with getting up on time in the morning and ends with going to bed early in the evening. Regular and healthy meals at home and in school also aid your child’s ability to learn. These suggestions and many more can be found in this brochure.

School and parents: We both want the best for your child. By communicating well with one another we will succeed.

I wish your child an excellent start at school,

Frauke Heiligenstadt

Hi! I am Tim. And this is my school. I’ve been going there for a few months now. I will tell you about my school day.

Tip 1: Get up in time and have breakfast together

We wake Tim up in time so we can have breakfast together.

Tip 2: Walk to school by yourself

My journey to school is not long. I walk to school sometimes together with other children from my class.

Tip 3: Make sure to be at school before class starts

We send Tim to school early enough so he gets there on time.

Hello. We are Tim’s parents. We will tell you how we support Tim during his school day.

After enrollment we accompanied Tim to school for a couple of days. Now he can manage on his own.

I like muesli for breakfast!

The bell will soon ring and school is about to start. We are in school on time, we are not late.
